## How to Dispose of Unwanted Medications

Expired or unwanted prescription and over-the-counter medications from households should never be disposed of by flushing them down the toilet or a drain. Although this method of disposal prevents accidental ingestion, it can cause contamination to Florida's aquatic environment because wastewater treatment systems are not designed to remove many of these medications.

## **Seven Steps to Safety**

Please use these practical guidelines when disposing of prescription and over-the-counter medicines:

## For Pills and Liquids:

- 1. Keep the medicines in the original container. This will help identify the contents if they are accidentally ingested.
- 2. Mark out your name and prescription number for safety.
- 3. For pills: add some water or soda to start dissolving them For liquids: add something inedible like cat litter, dirt or cayenne pepper.
- 4. Close the lid and secure with duct or packing tape.
- 5. Place the bottle(s) inside an opaque (non see-through) container like a coffee can or plastic laundry bottle.
- 6. Tape that container closed.
- 7. Hide the container in the trash. Do not put in the recycle bin.

• DO NOT put drugs in the trash without disguising them – human or animal scavengers may find them and misuse them.

• DO NOT give drugs to anyone else.

 DO NOT flush drugs down the toilet.

## Don't Flush That Leftover Medicine
